

Tip height Zone of Theoretical Visibility (ZTV) - 10km unscreened

Bare landform visibility

The Zone of Theoretical Visibility (ZTV) map below illustrates the theoretical extent of where turbines will be visible from within a 10km area, assuming 100% visibility and bare landform (without any trees, buildings or obstacles in the view) as per NatureScot guidance.

This map serves as a tool to inform the Landscape and Visual Impact Assessment (LVIA). The visibility indicated on the bare landform ZTV below is likely to be much less extensive in reality.
