

About RES

The world's largest independent renewable energy company

RES has been at the forefront of wind energy development for over 40 years and delivered more than 23GW of renewable energy projects worldwide. We employ more than 2,500 passionate people across the globe and are active in 14 countries, working across onshore and offshore wind, solar, energy storage, green hydrogen, transmission and distribution.

Sustainability lies at the core of our business activity and values, and we have been leading efforts to create a future where everyone has access to affordable zero carbon energy. The 23GW of green energy that we have developed and/or constructed offsets more than 21 million tonnes of carbon every year.

RES in Scotland

RES is a privately-owned company with a proud history in Scotland. We grew out of Sir Robert McAlpine, a British family-owned firm with over 140 years of experience in construction and engineering including the Glenfinnan Viaduct in the Highlands and the Emirates Arena and Sir Chris Hoy Velodrome in Glasgow. From our Glasgow office we have been developing, constructing and operating wind farms in Scotland since 1993.

We have developed and/or built 21 wind farms in Scotland, with a total generation capacity of 597MW, and have recently finished constructing Blary Hill Wind Farm in Argyll and Bute. We were also involved in the 12-turbine Meikle Carewe Wind Farm near Netherley, in Aberdeenshire, which we now operate. The project was commissioned in July 2013 and injected £1.1 million into the Aberdeenshire economy during the construction phase. For further information about RES, visit www.res-group.com.
